Brief Summary and Statement of Need:  The UAF Seward Marine Center is located at the head of Resurrection Bay, one of the primary docking facilities for visiting research vessels and home-port of the NSF-owned and UAF-operated Global Class R/V Sikuliaq. Construction and renovation of modern forward-looking sea and shore-side infrastructure is needed to support future Arctic Ocean observing, prediction and scientific breakthroughs. Project will provide construction of a new dock for year-round servicing/berthing of the R/V Sikuliaq, along with new warehouse and shop facilities constructed to directly support efficient and effective high-latitude maintenance, operations, and research.  Funding: FY2023 FY2024 FY2025 FY2026 FY2027 FY2028 Total 1002 Fed \$94,400,000 \$94,400,000 Rcpts
